

**Acorn Nuts Cont.**

**Stainless Steel Hi-Crown Acorn Nuts**

These acorn nuts offer are taller than the standard acorn nuts and are able to cover longer lengths of exposed threads.

**Stainless Steel Nylon Insert Capped Acorn Lock Nut**

Acorn nuts are used for safety and appearance because of their high crown caps that cover exposed threaded ends. They add a finished look to any project.

**Square Nuts**

**Stainless Steel Square Nuts**

Square Nuts, or four sided nuts, are used most often in channel applications. Square nuts have a larger surface area, but do require more effort to secure.

**Wing Nuts**

**Stainless Steel Wing Nuts**

A wing nut permits frequent and rapid assembly and disassembly without the need for a tool. The wings enable the nut to be turned by hand.

**Hex Nuts**

**APM Hexseal® SEELNUTS®**

SEELNUTS® are designed for use on all types of adjusting screws, threaded studs, and machine bolts in applications where leakage may occur due to extreme pressures. Installed like an ordinary nut, SEELNUTS® form a high-pressure seal along the thread section and contact surface when torqued. Their single-piece design eliminates the need for gaskets, sealing compounds and surface preparations. Fully-adjustable and reusable, they resist vibration, provide metal-to-metal contact, and seal under vacuum or high pressure. Available in all standard thread sizes, the integral seal can be formulated for compatibility with most gases or liquids. They can also be supplied with self-locking pellets.
