

**Wall Anchors Cont.**

**Toggler® Snaptoggle® Toggle Bolts  
304-Stainless Steel BAS / BBS  
Series**

The patented SNAPTOGGLE toggle features a one-piece steel anchoring channel that does NOT fall behind the wall when the bolt is removed, allowing re-use of the anchor in the same hole. The channel pivots on the durable installation legs. The sliding cap zips down the legs to securely "capture" the wall between the channel and the cap. The legs snap off easily, flush with the wall, but do not break prematurely. Place item to be attached, insert bolt and tighten flush for easy, reliable, vibration-resistant anchoring.

**Toggler® Hollow Wall Anchors**

Patented revolutionary design features provide secure holding power for light and medium loads. Key activated positive locking action makes the anchor a rigid, weight-distributing truss that is vibration and shock proof.

Grip Range	Grip Range
3/8"-1/2"	5/8"-3/4"
9-13mm	16-19mm

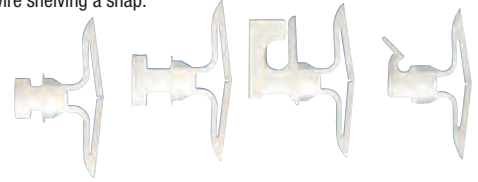

Screw specification - within each screw range, use any sheet metal screw or other screw with a sufficiently long thread [i.e., above the minimum screw thread length (TL). NOTE: only the threaded (TL) portion of the screw should be in the anchor itself; any unthreaded shank (S) portion of the screw may be in the fixture or item being anchored, but not in the anchor.

**Toggler® Specialty Anchors**

Specially designed to support the weight on the screw, not below it, for greater holding in hollow (and solid) walls -- even if you hit a stud. TOGLER Specialty Anchors simplify specialized installations. TH® Hook Anchor hangs wall decor quickly and easily. TBS1 Anti-Jacking Shelving Anchor aligns standards and prevents anchor from being jacked out of the wall. TBS2 Pegboard Anchor eliminates the need for furring strips. TBW Wire Shelf Anchor makes installing ClosetMaid® type wire shelving a snap.

50954	Expansion Anchor	3/8"		Polypropylene	100

**Toggler® SnapSku® Self-Drilling Drywall Anchors**

The only self-drilling drywall anchor that locks on the wall and resists shock & vibration. Activates with audible "pop", indicating correct installation. Works with #6, #8 and #10 screws (#8 preferred). Positive stop prevents overturning -- does NOT destroy the drywall. Can remove screw and reuse in same anchor.

**Toggler® Alligator® Solid Wall Anchors**

ALLIGATOR anchors outperform metal anchors 2 times their diameter! During installation, the screw extrudes the special polymer into the wall of the hole radially outward and along the length of the screw, up to twice the original length of the anchor, sealing the hole and bonding the screw to the wall.
