

**Gates**

**Portable Gates**

IEP Portable Security Gates can be used virtually anywhere and any way you need them, including, sealing school hallways, closing elevator banks, restricting access in offices, factories or warehouses. This Gate can be rolled to a site and lock to a wall with the included locking bar. To remove the gate, simply unlock the locking bar and roll away out of sight! Gates roll easily on 3" rubber casters. Use a starter gate from 6' to 12' wide, then simply use add-on gates for each additional 6' needed. And add lockable drop pins to add additional security for wide openings All gates come in a galvanized finish as standard, custom finishes are also available.

Part No.	Width	Height	Style
0529303	3 ft - 6 ft	78"	Wall Mount

**Portable Pressure Fit Gates**

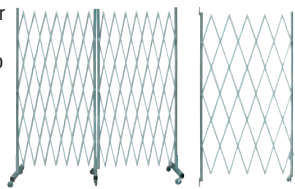

IEP Pressure Fit Gates lock into place quicker and easier than any other portable gate offered. It can be moved effortlessly from place to place and locks easily to provide instant security without up-front installation. There is no need for floor or wall anchors with this gate. Designed for use as traffic control units in schools, park district facilities, churches and community centers with the kind of adaptability to fit almost any condition and need. It rolls easily into place and can be made to disappear when not in use. All gates come in a galvanized finish as standard, custom finishes are also available.

**Folding Gates**

Creating access control points without limiting ventilation is easy with Wireway/Husky folding gates. These heavy gauge gates are built to last in commercial and industrial environments. Ideal for loading docks or anywhere safety and access control is a priority.

Part No.	Width	In Use Height
7047542	5.5 ft	5 ft
7047551	7.5 ft	8 ft
7047566	8 ft	6-1/2 ft
7047568	10 ft	6-1/2 ft
7047569	10 ft	8 ft
7047570	12 ft	6-1/2 ft
7047572	14 ft	6-1/2 ft
7047573	14 ft	8 ft

**Truck Gates**

Xtra-Duty Track Gates offer twice the durability and security of our standard heavy-duty gates and are made of galvanized steel. These gates maintain the same height while retracted or in-use and are designed to include a top and bottom track for additional security and ease-of-use. These super-rugged gates ensure reliable access control by sealing corridors and securing points of entry within schools, transportation facilities such as rail, air and seaports, retail environments and government facilities. Made to exact specifications, all Xtra-duty Track Gates are custom-fabricated to secure and protect openings of any size and are available in custom finishes. Fixed or hinged options are also available.

Part No.	Width	Height
0529313	8 ft	90"
0529314	10 ft	90"
0529315	12 ft	90"

**Store Front Gates**

These gates provide a cost-effective visual and physical deterrent providing after hours storefront security. In the open position, these gates slide out of the way becoming virtually invisible during working hours. Gates are available in top track and bottom track designs as well as single and pair configurations.

- Bottom track gates are designed to provide a secure gate installation along the inside of storefront windows. These gates can be made to pivot out of the opening and to swing flat - out of sight.
- Top track gates are designed to allow the gate to be hung much like a curtain across any storefront length - recommended for openings over 20 feet wide and can secure several hundred feet.
- Optional top H bracket for pair gate provides superior security when in use.
- Storefront gates also available in Xtra-Duty models with twice the weight and strength
- All gates come in a galvanized finish as standard, custom finishes available.

Part No.	Width	Height
0529316	3 ft	72"
0529317	6 ft	72"
0529318	9 ft	72"
0529319	106"	106"
0529320	12 ft	72"
