

## Wire Rope & Accessories Cont.

### Wire Rope Grips

#### Easy to Use

- Versatility - All models are rated for a variety of wire sizes and types, so fewer grip changes are required.
- No Lock-Ups - Grips open easily and release instantly to quickly insert or remove wire.
- Large Handle Eye Opening - Accepts standard hooks and easily attaches to tackle blocks.
- Choice of Design - Spring-loaded or non-spring-loaded models available.
- Rugged and Portable
- Forged Steel Construction - Durable yet lightweight.
- Yellow Chromate Finish - Protects components from rust and corrosion.

#### Hot Line Models

- Spring-Loaded Gate - Standard on all hot line models. Lineman can use a holding stick to open the gate and place the grip on the wire. When released, the gate closes over the wire and prevents the grip from falling off the wire.
- Locking Mechanism - Notched handle on spring-loaded models locks grip in open position for placement on or removal from wire, then releases instantly.
- Jaw Options
- Replacement Jaw - Machined with large, aggressive teeth. Available on 5000 and 10,000 lb. models suitable for applications requiring exclusive use on EHS cable or guy strand.
