Dock Plates, Dock Boards & Loading Ramps

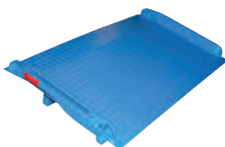

Steel Dock Board

Constructed of high strength (55,000 psi) steel for long life. Beveled edges on both ends permit smooth entry and exit. Deck is diamond plated for safe, efficient use. Welded safety curbs for maximum strength. Locking legs minimize ramp movement and are uneven to allow the dock board to sit canted for easier floor pickup by fork trucks when not in use. Standard with lever lift for quick portability with fork truck. Manufactured in compliance with OSHA. When using three wheeled fork trucks, select capacity +20% due to concentrated load on center of board.

- Bend is 11° and 9" from Beveled Edge / Legs are 12" from Edge
- Tread plate Design Ensures Positive Traction
- Standard with Lever lift
