

Paint Additives & Activators

**High Performance
9100 DTM Epoxy Mastic
Activators Coating**

- For use with High Performance 9100 System DTM Epoxy Mastic Coating. Order base component separately.
- Standard Activator - For air and surface temperatures of 50-100°F (10-38°C).
- Immersion Activator - For fresh or salt water immersion of steel or concrete where water temperatures do not exceed 125°F (52° C).
- Low Temperature Activator - For air and surface temperatures of 40-60°F (5-15° Celcius).
- Fast Cure Activator - For faster cure to minimize downtime.
- Low VOC Activator - For <250g/l VOC applications

Part No.	Mfg. No.	Container Size	Color	Finish	Tack-Free Time	Recoat Time	Drying Time	Coverage Area	Application

0160648	9104402	1 gal	Clear	Gloss	4 - 8 hr	4 - 8 hr	5 - 10 hr	115 - 190 Square Feet/Gal	Concrete, Masonry, Metal

**Concrete Saver® 6000
System Water-Based Floor
Epoxy Activator**

Use with Concrete Saver® 6000 System Water Based Floor Epoxy, Two-component system: Must use base and activator. Order base and activator separately

Part No.	Mfg. No.	Container Size	Color	Finish	Tack-Free Time	Recoat Time	Coverage Area	Drying Time
0160606	6001604	1 pt	White	Water-Based	16 hr	1 - 2 hr	200 - 350 Square Feet at 1.5-2.5 mils	16 - 72 hr

Fastenal specializes in manufacturing parts to military and aerospace specifications.

Paint

**C580 System Commercial
Latex Paint**

This product features high hiding, excellent touch-up, burnish resistance, low VOC and easy soap and water clean-up.

- General Purpose Latex Paint is especially formulated to provide a high-hiding, uniform finish with excellent touch-up qualities when properly applied on interior walls and ceilings.

Type - Paint	Part No.	Container Size	Color	Finish	Tack-Free Time	Recoat Time	Coverage Area
