

Roller Grids

Paint Roller Grid

Use with 5-gallon pails. Manufactured from Heavy-duty expanded wire that is reinforced on all 4 sides.

Part No.	Mfg. No.
0602086	5GGSS

Extension Poles

Extension Poles & Handles

Fiberglass and Aluminum "push-button" extension poles have easy to use "push-button" spacing with standard threaded metal tip.

Part No.	Mfg. No.	Extension Length	Style
0604718	83024	2 ft - 4 ft	Push Button
0604719	83048	4 ft - 8 ft	Push Button
0604720	83612	6 ft - 12 ft	Push Button
0604721	83816	8 ft - 16 ft	Push Button

Painting Stencils

Reusable Stencils

Commercial grade roadway stencils are precision cut to ensure high quality marking.

- Material 1/8" "LDPE (Low Density Polyethylene)
- Long Life - built for repetitive daily use
- Will not be damaged by paint or solvents
- Lays flat for best quality painting
- Precision cut to ensure high quality marking

Part No.	Mfg. No.	Legend Size	Legend
0616233	70480	42" Long	Arrow Curved

0616204	70061	12" x 9"	Stop

Anchoring Cement

Rapid Setting Anchoring Cement

Anchoring Cement is a one-component, proprietary blend of cementitious materials and performance enhancing chemical additives. This fluid, ultra rapid-setting, high strength, hydraulic cement is designed for grouting and anchoring. Anchoring cement is non-shrink and a controlled expansion product.

Used for fence posts, sign posts, light poles, parking meters. Also used for bolts, ties, dowels, reinforcing steel, anchoring rails, base plates, bearing plates and columns.

Part No.	Container Size	Working Time
0207280	50 lb	15 min

POR-ROC Anchoring Cement

A non-shrink anchoring cement, mixed with only water, for interior applications. Use for setting anchor bolts and re-bar into concrete.

Part No.	Container Size	Working Time	Curing Time	Application
63090	50 lb	15 min	1 hr	Concrete patching and repair

Super Por-Roc Anchoring/Grouting Cement

A cement based anchoring material for exterior or wet exposure applications, can also be used for interior anchoring of re-bar and anchor bolts.

Part No.	Container Size	Working Time	Application
0239070	50 lb	20 min	Anchoring/grouting

Concrete Repair Products

Loctite® Fixmaster® Magna-Crete®

A two-component, rapid setting concrete repair and grouting system. Cures faster than concrete, and bonds to new and old concrete as well as most construction materials including wood and steel. Does not use a water additive and can be applied at virtually any temperature without shrinkage. Freeze/thaw and de-icing salt resistant.

Part No.	Mfg. No.	Container Size	Container Type	Color
0151024	95551	1 gal	Bottle	Gray
0151025	95555	5 gal	Pail	Gray

Grout

Multi-Purpose Grout

Rock River Multi-Purpose Grout is a non-shrink, non-corrosive, non-metallic grout. It is formulated as a cement based product with high quality raw materials. Rock River Multi-Purpose Grout offers pumpability, heat and thermal shock resistance and provides controlled, net positive expansion.

- Pourable/pumpable
- Interior/exterior applications
- Resists water and salt penetration and damage from freeze-thaw cycles
- Yields: .43 Cubic Feet

Rock River Multi-Purpose Grout is designed for interior and exterior grouting of precast concrete components, structural column base plates, pump and machinery bases, anchoring bolts, rebars, dowels, bearing pads, keyway joints and crane rails. It finds applications in paper mills, oil refineries, food plants, chemical plants, sewage and water treatment plants etc.

Part No.	Mfg. No.	Container Size	Color
0207277	PL-CT-MP	50 lb	Gray
