Screw Extractors

Micro-DRILL-OUT® is a micro power extractor designer to remove small broken bolts — a drill bit AND extractor in one. It has the same features as our larger extractor, DRILL-OUT®, but is designed to extract smaller bolts less than 1/4"

proGrabit® extractors are a two-step (drill bit and extractor in one) used with a 3/8" variable speed reversible drill for fasteners as small as No.4 screws to as large as 3/8" bolts with Hex, Phillips, Torx and Square in wood, plastic or metal.
