

**Sheet Material Cont.**

**Natural Color Polypropylene Sheet**

Polypropylene absorbs minimal moisture and has excellent dielectric (nonconducting) strength. Most forms of polypropylene are FDA compliant for use in the food industry.

- Excellent resistance to organic solvents, degreasing agents and electrolytic attack
- Working temperature and tensile strength are superior to low or high density polyethylene
- Other sizes available upon request

**Natural 6/6 Nylon Sheet**

A general purpose Nylon that is one of the most common grades; type 6/6 offers excellent mechanical performance combined with a low cost.

- Ideal replacement for materials from metal to rubber- Used in paper, textile, electronic, food and mining fields
- Low surface friction
- High Strength
- Good sound dampening characteristics
- Other sizes available upon request

**Nylon 6/6 MDS Sheet**

Filled with Molybdenum Disulfide, this Nylon 6/6 sheet offers increased wear resistance and surface lubricity allowing for longer life.

- Weighs only 1/7 as much as bronze
- Reduces lubrication requirements, eliminates galling
- Low surface friction
- Increased surface hardness
- Increased heat resistance
- Higher tensile properties
- Other sizes available upon request

**ABS Sheet**

Acrylonitrile Butadiene Styrene sheet is a low cost rigid thermoplastic with high impact strength and excellent abrasion resistance. Ideal for turning, drilling, milling, and shearing to name a few.

- Easy to Machine & Fabricate
- Resistant to many chemicals, including alkalis, acids, some oils, and inorganic salt solutions
